
Boost your research reproducibility with Binder

The #TuringWay team
CarpentryConnect, 26 June 2019

Agenda

13:30 – 13:40: Registration and introductions

13.40 – 14.00: Introduction to the workshop and The Turing Way

14.00 – 15.00: Why you need a reproducible computing environment and how Binder can help

15.00 – 15.30: Coffee break

15.30 – 16.30: Zero to Binder, a guided tour of building a Binder resource

16:30 – 16:50: Build your own Binder (with coffee from 2.00)

16:50 – 17:00: Demonstrating your Binder, general questions, feedback and close

Founding the Institute

“We will found The Alan Turing Institute to ensure Britain leads the way again in the use of big data and algorithm research”

George Osborne, Chancellor of the Exchequer
Budget Speech, March 2014

Urban analytics

Developing data science and AI focused on the process, structure, interactions and evolution of agents, technology and infrastructure within and between cities.

Data-centric engineering

Bringing together world-leading academic institutions and major industrial partners from across the engineering sector, to address new challenges in data-centric engineering.

Data science for science

Ensuring that research across science and the humanities can make effective use of state of the art methods in artificial intelligence and data science.

Health

Accelerating the scientific understanding of human disease and improving human health through data-driven innovation in AI and statistical science.

Public policy

Working with policy makers on data-driven public services and innovation to solve policy problems, and developing ethical foundations for data science and AI policy-making.

Research Engineering

Connecting research to applications, helping create usable and sustainable tools, practices and systems.

Cross cutting theme: Tools, systems and practices

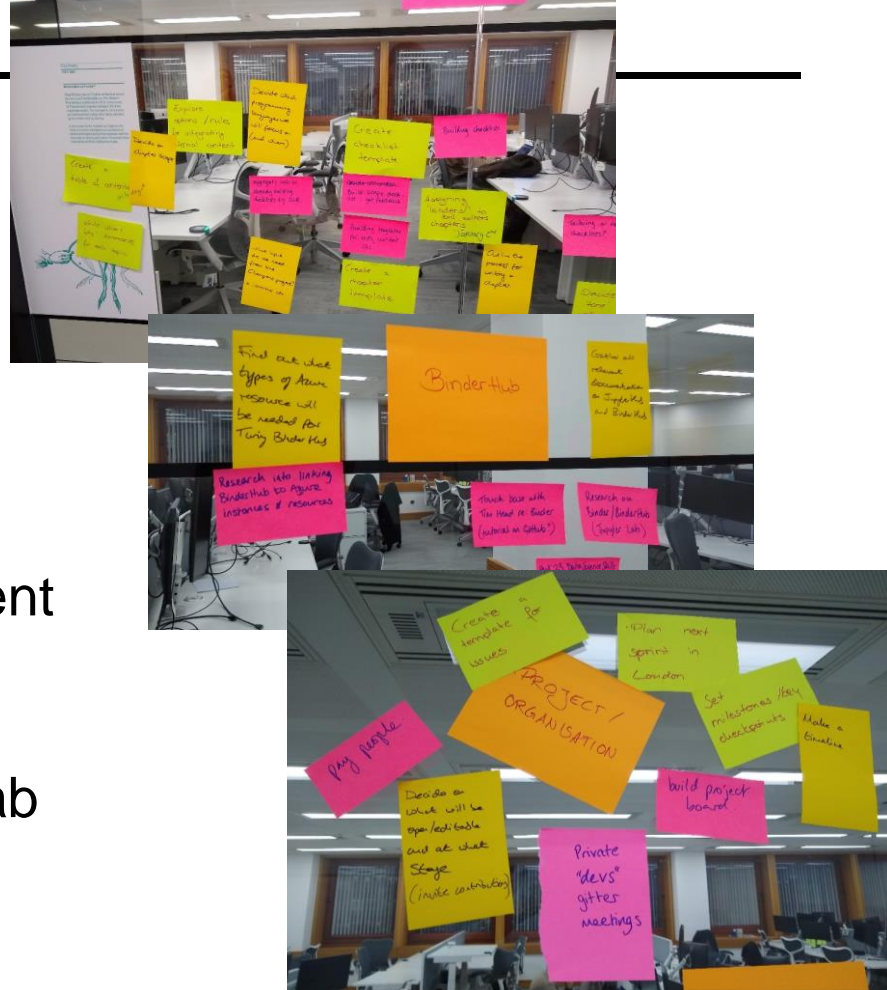

The Turing Way

A lightly opinionated handbook
for reproducible data science

<https://github.com/alan-turing-institute/the-turing-way>

Including chapters on:

- Research data management
- Open science
- Reproducibility
- Version control with git
- Your working environment
- Capturing your compute environment
- Testing for research
- Continuous integration
- Collaborating through GitHub/GitLab

Checklists for researcher, PI and admin team

- Researcher
 - Version control
 - Capturing compute environment
 - Writing and running the code
- PI
 - Results presented are those from the final run of the analysis
 - Check that another researcher can run the code
- Admin
 - Version control
 - Data and code archive
 - Open access publication

Open Leadership Principles

Understanding
You make the work
accessible and clear

Read more

<https://mozilla.github.io/olm-whitepaper>

Sharing
You make the work
easy to adapt,
reproduce, and spread

Participation & Inclusion
You build shared
ownership and agency to
make the work inviting
and sustainable for all.

Dutch psychologist admits he made up research data

SCIENCE NEWS | Wed Nov 2, 2011 | 9:50am EDT

Dutch psychologist admits he made up research data

By Kate Kelland | LONDON

A Dutch psychologist has admitted making up data and faking research over many years in studies which were then published in peer-reviewed scientific journals.

Diederik Stapel, a psychologist working at Tilburg University in the Netherlands, said he had "failed as a scientist" and was ashamed of what he had done, but had been driven to falsifying research by constant pressure to perform.

The respected journal Science, which published some of Diederik Stapel's work earlier this year, issued an "expression of concern" editorial in which it said it now had serious concerns about the validity of Stapel's findings.

Reinhart, Rogoff... and Herndon: The student who caught out the profs

By Ruth Alexander
BBC News

20 April 2013

This week, economists have been astonished to find that a famous academic paper often used to make the case for austerity cuts contains major errors. Another surprise is that the mistakes, by two eminent Harvard professors, were spotted by a student doing his homework.

It's 4 January 2010, the Marriott Hotel in Atlanta. At the annual meeting of the American Economic Association, Professor Carmen Reinhart and the former chief economist of the International Monetary Fund, Ken Rogoff, are presenting a research paper called Growth in a Time of Debt.

At a time of economic crisis, their

How can the Turing Way help?

*Make
reproducibility,
“too easy
not to do”*

*Share the
responsibility
of
reproducibility*

Plan for today

<https://github.com/alan-turing-institute/the-turing-way>

Goals

- Understand how your computational environment impacts upon reproducibility
- Learn what Binder is and how it can help
- Build your own Binder!
- ...

In a supportive and friendly environment!

Code of Conduct

“The Turing Way team are dedicated to providing a welcoming and supportive environment for all people...we do not tolerate behaviour that is disrespectful to our community members or that excludes, intimidates, or causes discomfort to others.”

https://github.com/alan-turing-institute/the-turing-way/blob/master/CODE_OF_CONDUCT.md

Code of Conduct

- Be respectful of different viewpoints and experiences.
- Use welcoming and inclusive language.
- Do not harass people.
- Respect the privacy and safety of others – stickers available if you don't want your photo taken
- Be considerate of others' participation.
- Don't be a bystander.

https://github.com/alan-turing-institute/the-turing-way/blob/master/CODE_OF_CONDUCT.md

Agenda

13:30 – 13:40: Registration and introductions

13.40 – 14.00: Introduction to the workshop and The Turing Way

14.00 – 15.00: Why you need a reproducible computing environment and how Binder can help

15.00 – 15.30: Coffee break

15.30 – 16.30: Zero to Binder, a guided tour of building a Binder resource

16:30 – 16:50: Build your own Binder (with coffee from 2.00)

16:50 – 17:00: Demonstrating your Binder, general questions, feedback and close
