

The Alan Turing Institute

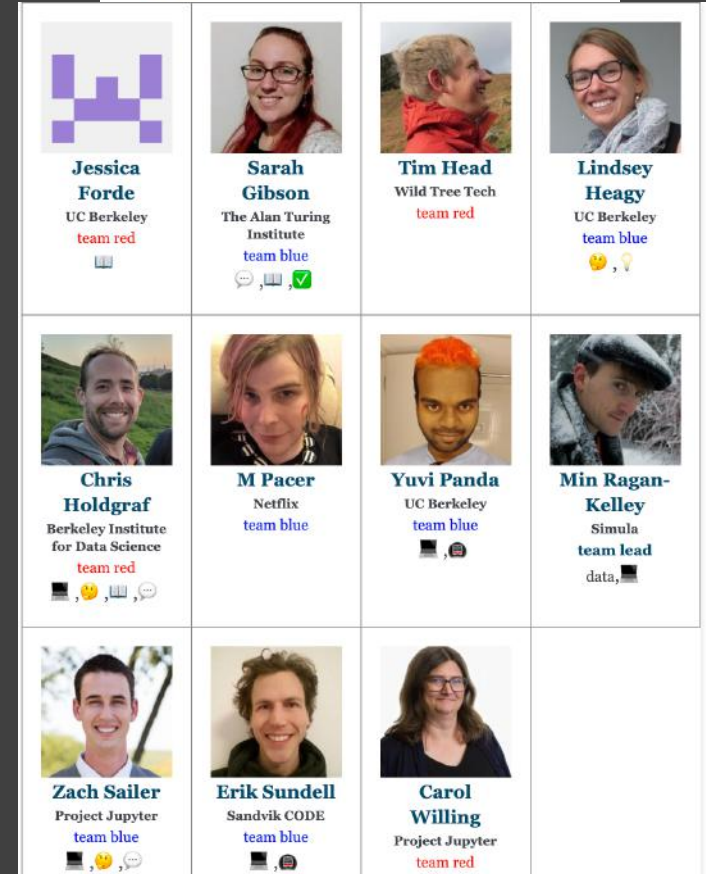

Collaborating Across Borders

Sarah Gibson

My Collaboration

- mybinder.org & docs.mybinder.org
- Open source infrastructure
- Hosts reproducible software in the cloud
- Distributed team of volunteers across US, Europe and Asia
- Asynchronous forms of communication: GitHub issues, community forum

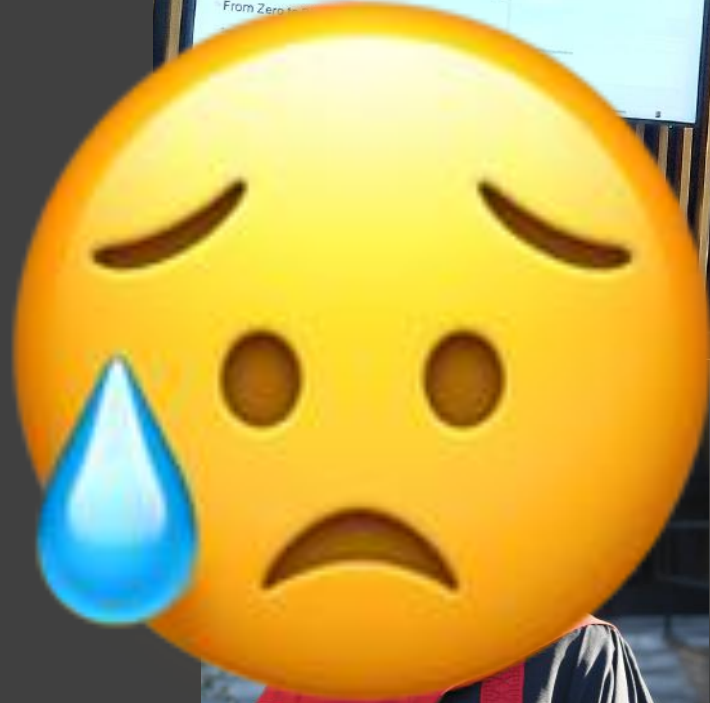

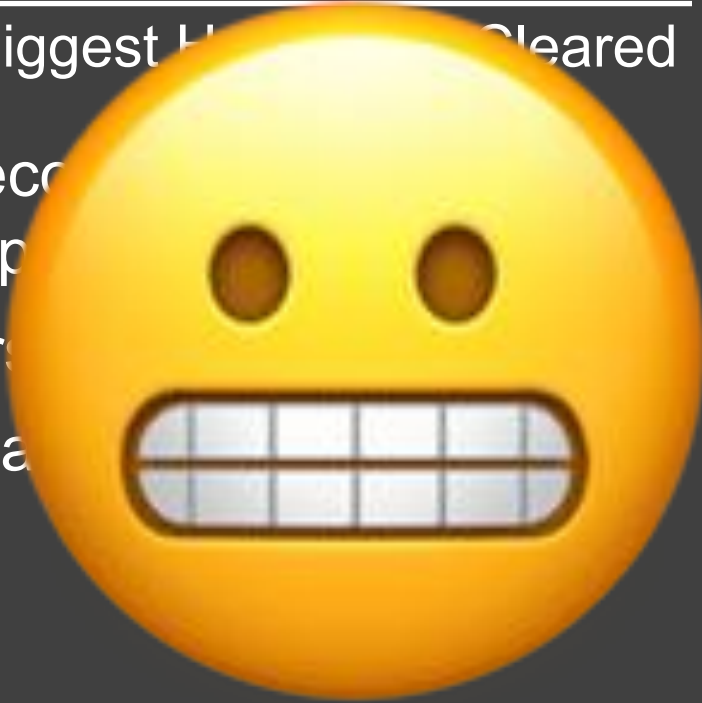

My Biggest Hurdle I've Overcome

- Becoming an RSE capable of contributing
- First job post-PhD
- Needed to learn the skills

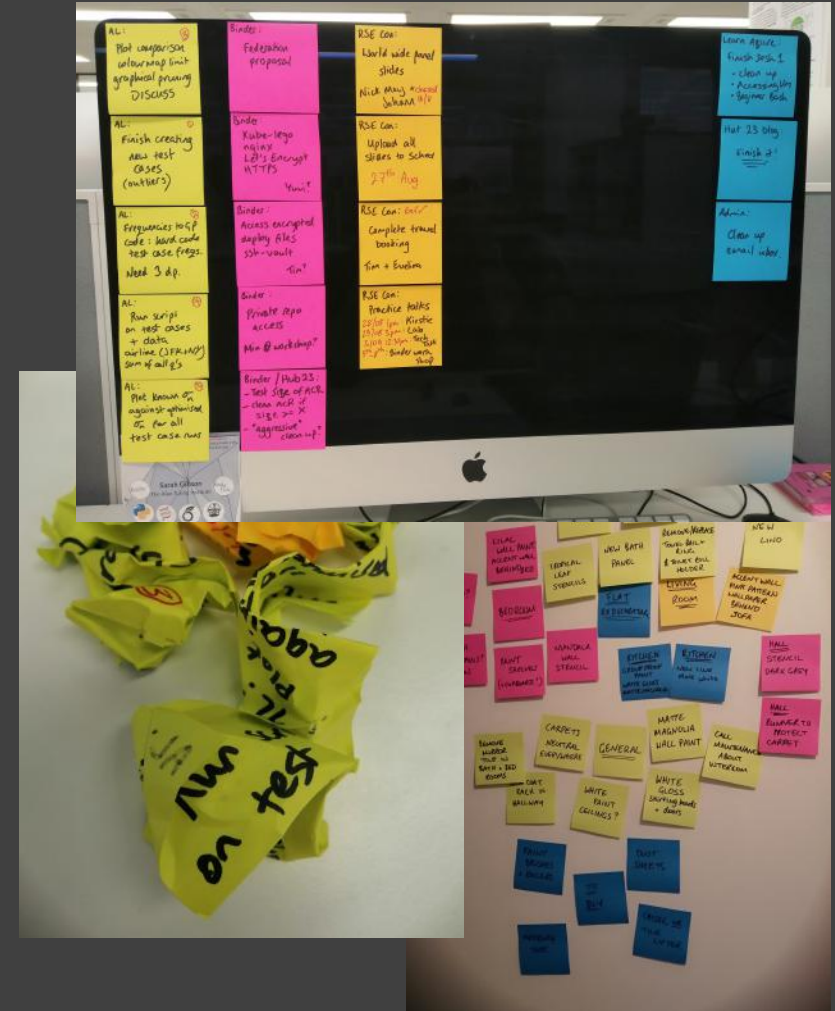

My Biggest Mistake I've Ever Made

- Becoming a capitalist
- First time I ever
- Learning to

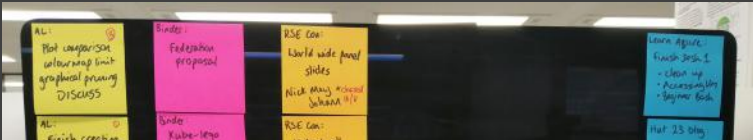

My Biggest Barrier to Sharing

- TIME! 🕒
- New exciting projects
- Continuing passion projects
- Good work/life balance
- Not taboo! Other Binder members face this too!

My Biggest Barrier to Sharing

- TIME! 🕒
- New exciting projects
- Continuing passion projects
- Good work/life balance
- Not taboo! Other Binder members face this too!

This answer can feel disappointing if you're not already involved in open source.

Many people (me included!) assume there must be a “special ingredient” to be a part of the open source community.

In fact, it's the same as any other project!

How can we incentivise?

- Need explicit reward structures
- People won't share if they're not encouraged
- Even if we *do* remove barriers

Get involved!
